

FALL RESTRAINT / ANCHOR POINT TOOL

- Provides isolation from potential differences by means of the fiberglass isolation link in the tool
- Designed to meet 5,000 lbs. OSHA requirements for fall restraint
- Fiberglass section has solid foam core
- Insulation / Isolation distance between metal castings is 6"
- Can be used to secure the line workers safety belt or the worker may choose to attach a retractable lanyard or shock absorbing lanyard as the attaching device
- The large U bolt allows a linesman's safety belt to fit through the eye, singled or doubled, to aid the lineman in gaining the proper work position
- A ratchet assembly with 44" nylon strap allows for quick and easy attachment to utility poles
